**AGENCY:** Office of Energy Efficiency and Renewable Energy, Department of Energy.

**ACTION:** Correcting amendments.

**SUMMARY:** On April 21, 2014, the U.S. Department of Energy (DOE) published a final rule in the Federal Register that amended the test procedure for refrigerators, refrigerator-freezers, and freezers (79 FR 22320). Due to drafting errors, that document incorrectly listed the name of a third-party test procedure that was incorporated by reference. This final rule corrects those errors.

**DATES:** This correction is effective [INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER].

## **SUPPLEMENTARY INFORMATION:**

### **I. Background**

On April 21, 2014, DOE's Office of Energy Efficiency and Renewable Energy published a test procedure final rule in the Federal Register titled, "Test Procedures for Refrigerators, Refrigerator-Freezers, and Freezers" ("April 2014 final rule"). 79 FR 22320. Since the publication of that final rule, it has come to DOE's attention that, due to a technical oversight, certain portions of the regulatory text adopted in the April 2014 final rule for appendix A to subpart B of 10 CFR part 430 (Appendix A) contained erroneous references to AS/NZS 4474.1:2007, Performance of Household Electrical Appliances—Refrigerating Appliances; Part 1: Energy Consumption and Performance, Second edition, published August 15, 2007, which is incorporated by reference at §430.3. Specifically, several references to this standard in Appendix A are incorrectly listed as "AZ/NZS 44474.1:2007." The text of §430.3 correctly references this incorporated standard. DOE has also become aware that the text adopted in the April 2014 final rule for appendix B to subpart B of 10 CFR part 430 (Appendix B) contains an error in a formula

in section 5.2.1.3, in that the published version is missing the “K” adjustment factor present in the other formulas in section 5.2 of the test procedure.

## **II. Need for Correction**

As published, the adopted test procedure text may result in confusion due to the incorrect reference in Appendix A and the incorrect formula in Appendix B. Because today’s final rule would simply correct errors in the text without making substantive changes to the test procedures, the changes addressed in this document are technical in nature. Accordingly, DOE finds that there is good cause under 5 U.S.C. 553(b)(B) to not issue a separate notice to solicit public comment on the changes contained in this document. Issuing a separate notice to solicit public comment would be impracticable, unnecessary, and contrary to the public interest.

## **III. Procedural Requirements**

DOE has concluded that the determinations made pursuant to the various procedural requirements applicable to the April 21, 2014 test procedure final rule remain unchanged for this final rule technical correction. These determinations are set forth in the April 21, 2014 final rule. 79 FR at 22345-22348.
